Introduction

LOGICSTACK is a leading, highly innovative software house, systems integrator and technology provider, established to provide leading edge intelligent technical solutions and consulting services to businesses, organizations and government in order to allow the efficient and effective secure access and communication with various heterogeneous information resources and services, anytime and anywhere.

Combining emerging technologies (like Cloud Computing, Software-as-a-Service, Social Networks, Mobility, Semantic Web, Linked Open Data, and Big Data Management) in order to help organizations to meet their business strategy goals and benefit from the power of technology innovation;

Definition of the IT Strategy, Infrastructure and overall Enterprise Architecture required for organizations and enterprises to support the efficient and effective achievement of their business objectives, ensuring the end-to-end IT security across the organization;

Our Clients

Our strength comes from our customers, we provide specially designed technical support and always want to do beyond the expectations of our clients, we care about your reputation as much as we do about ours.

About us

LOGICSTACK a solutions-focused company established in 2019. We provide complete business solutions, which enables businesses to leverage leading-edge technology to gain sustainable competitive advantages in today's marketplace. We are known for our talent, passion, work ethic and building ongoing long term relationships and commitment through support and maintenance. A good team is significant to the success of any business.

LOGICSTACK takes pride in having a trustworthy and sturdy team of more than 5 members. Since our founding, we have worked with the best in the industry. Our turn-around time is the most minimal and we assure reply within 1 business day.

We offer a wide range of IT services to provide you with the best solutions for your business. Whether you want development services from scratch or you want to have expert functionality added to your existing website, we are here for you. Our services and delivered solutions are not only reasonably priced but also of the paramount quality.

From IT strategy consulting and comprehensive technology roadmaps to the end-to-end development of scalable solutions, Intellectsoft delivers a full-cycle software development services that adapt seamlessly to your project requirements and business needs.

Increase of the R&D capacity of business partners, staffing their project teams with the highly qualified and experienced research engineers of LOGICSTACK who add value and ensure the robustness and success of the research and technological development process.

Our services

Enterprise Software Development

We provide full range of custom software development services to bring your ideas to life. Our turnkey solutions are custom-designed to fit into your enterprise software ecosystem.

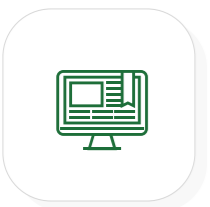

Web App Development

We create beautifully designed web apps precisely tailored to your situation. From providing Software as a Service to creating custom software to support your customers, our Web App team will get you up and running.

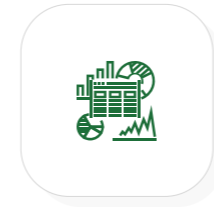

Mobile App Development

US consumers spend nearly a quarter of their day on their mobile phone - and 92% of that time is spent using apps. Your app needs to be brilliantly designed and intuitive to have a shot at getting anyone's attention.

Open edX Services

We offer clients a unique advantage when it comes to custom development, implementation and integration, managed hosting, support and training.

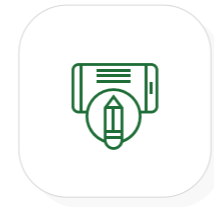

DevOps Solutions

Our DevOps team manages the relationship between operations and development to ensure everything runs smoothly throughout the entire lifecycle of the software - from design to development to production support.

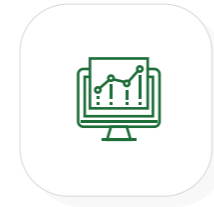

QA & Software Testing Solutions

A software team is only as good as the quality of the work it produces. That's why we value excellence over success, and provide specialized QA & testing as a separate service - as well as baked right into every project we take up.

UI-UX Solutions

Good user experiences are very important to us for every software we create. By basing our software on human-centered design principles.

Web Scraping

Our engineers create custom web scraping solutions that quickly and efficiently gather the data you need and provide it to you in an elegant structure.

Business with us

We believe in the possibility of what can be. Our team of 5+ experienced software engineers, developers, UX architects, designers and QA engineers are driven to produce impactful software. We have created thousands of solutions over the last decade and helped businesses like yours expand at a rapid scale. We understand the challenges of working with a remote team and focus on providing an experience that feels like having a software development team next door. Bring your idea. Let us create it.

We believe in nurturing long term relationships with our clients. You need a partner you can trust to not only bring your idea to life, but also to grow with.

We have rapidly built a world-class team of engineers ready to take on diverse and challenging projects with an aim to create real value for our partners and community.

Give us a problem and we will engineer a solution! Our team of world-class engineers has developed enterprise and analytical software used by millions of users every day.

LogicStack Legacy

We take pride in our strong capability for designing and engineering robust software using mobile, web and cloud technologies. Specializing in custom web applications, intuitive mobile apps, and robust data mining techniques, our team creates digital solutions that impact millions of lives.

THANK YOU
